

RECTANGULAR SCREEN

Technical data sheet

Description

ERIMAKI manufactures and sells rectangular vibrating screens and vibrating tables designed for the sieving and conveyance of solid and liquid materials.

Vibration is generated by two motorised vibrators equipped with adjustable masses, allowing to vary the conveyance speed and thus the hourly production rate.

The rectangular vibrating screens and the vibrating tables are custom-made, to better meet the technical and plant design needs of our customers. They may be made of AISI 304/316 stainless steel or of painted carbon steel.

Fields of application

- Recovery and recycling
- Chemicals
- Pharmaceuticals
- Plastic
- Abrasives
- Mining etc.
